PROFILE

As an entry-level Android developer with a strong foundation in coding, I bring unique insights from my six-month tenure as an AI Trainer at Scale AI, where I honed my coding expertise while training AI models in code generation. This experience has sharpened my problem-solving abilities and deepened my understanding of algorithmic thinking. Eager to learn and grow in the Android development field, I am committed to leveraging my background to create innovative and user-centric mobile applications.

EMPLOYMENT HISTORY

Jun 2023 — Nov 2023

AI Trainer, Scale AI

Remote

At Scale AI, my role as an AI Trainer focused on training generative AI models using specialized coding data. I was responsible for creating targeted training scenarios that enhanced the model's proficiency in understanding and generating code. This work not only improved the models' efficiency but also deepened my expertise in the intersection of AI and software development.

EDUCATION

Sep 2019 — Sep 2023

Bachelors in Computer Science (BSCS), National University Of Sciences and Technology

Quetta

SKILLS

Kotlin

API Integration

Jetpack Compose

Problem Solving

xml

Python

RoomDB
